

PERFECT SPECIMENS A 1960s sci-fi B-movie springs to mind when you look at these indoor garden appliances. And you wouldn't be far wrong. Using technology developed by Nasa, these mini-me space stations create an organic rainforest environment in which you can grow herbs, chillies, salad leaves and even peppers in your kitchen, feeding them only a supermodelish diet of water, nutrients and air. Aerogrow, £119.75
